

Mobilizing your EHR (and making it usable) with iScribeHealth.

iScribe is the mobile-ready documentation tool that lets you get the full functionality of Athena without having to touch it at all.

How It Works

After performing a 5-10 minute (seriously) API integration between iScribe and Athena, users are free to start logging patient data through the mobile EHR app. Use built-in speech-to-text tools, telehealth, intuitive touch functionality, and all the features you expect from Athena, laid out in a beautiful, user-centric interface.

1 Day Setup & Integration

- Up to 200 hours saved annually per physician
- \$30,000 saved on average annually per physician
- Save an average of 36 clicks a patient

iScribe enables your practice by enabling YOU. Adopt iScribe to be more:

PRODUCTIVE

- No more after-hours data entry – do it all during clinic hours
- Minimize clicks and ditch the tabs and confusing templates found in Athena
- Enter data one time, in one place. Never touch your EHR again!

COMPLIANT

- iScribe's fields match up 1:1 Athena so you're capturing all the right data
- Follow through on Meaningful Use criteria and seamlessly transition to MACRA
- iScribe meets all security and compliance protocols according to HIPAA

PROFITABLE

- Deliver stellar patient interactions that encourage future referrals
- Shorten your billing cycle with same day complete documentation
- Save time on data entry and provide care to a higher patient volume

FOCUSED

- Shift the priority from data-entry back to what you really want to do: practice medicine
- Focus on your patient during the exam instead of burying your head in the EHR
- Use time that used to be dedicated to data entry to pursue continued learning and networking

**Ready to take the reins on your EHR use?
